

*Golden Band Resources is on The Path to Production and requires the following key position to help advance the company through exploration and development and into production. Based in Saskatoon, Saskatchewan, Golden Band is looking to bring several of its La Ronge Gold Belt properties into production using its existing mill. With our extensive property portfolio, exploration will continue to be a key focus.*

## ENGINEERING MANAGER

This newly created position reports to the Vice President of Operations and the successful applicant will play a key role in overseeing the company's technical functions during the exploration, development, and production stages. The key functions and responsibilities of the position include:

- Mine design and planning for open pit and underground mine development projects
- Management of technical data for feasibility stage projects including metallurgical testwork and process flowsheet analysis.
- Analysis of mine and mineral economics
- Liaise between exploration, resource development and mine operations personnel.

To succeed in this challenging position, you will require:

- 10 years experience, including project management and exposure to cost analysis models.
- Extensive experience with NI43-101 reporting requirements
- Professional Engineer designation with a mining or related engineering discipline

This is a full time position based in Saskatoon, Saskatchewan. Remuneration will be commensurate with experience, qualifications, and the attainment of performance-related objectives.
