

Golden Band Resources is on The Path to Production and requires the following key position to help advance the company through exploration and development and into production. Based in Saskatoon, Saskatchewan, Golden Band is looking to bring several of its La Ronge Gold Belt properties into production using its existing mill. With our extensive property portfolio, exploration will continue to be a key focus.

SENIOR MINE GEOLOGIST/ PROJECT GEOLOGIST

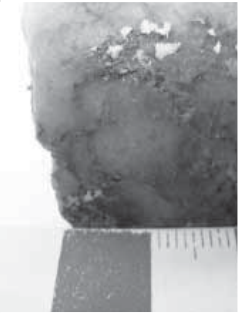

We are seeking a Senior Mine Geologist and a Project Geologist to join our operations and exploration teams to help us achieve our goal of becoming the next gold producer in Saskatchewan. The successful applicants will be involved with our Bingo underground and Greater Waddy Lake exploration programs.

The key functions and responsibilities of the position include:

- Geological mapping and interpretation in an underground environment
- Supervise underground sampling, diamond drilling and core logging.
- Direct ore drift development, ore/waste haulage and stockpiling.
- Maintain and update a geological database
- Technical assistance to the mine operations team during ore development and resource definition.

To succeed in these challenging positions, you will require:

- 2 to 8 years narrow vein mining experience
- Experience supervising diamond drilling and drill core logging.
- Understanding of surface mineral exploration methods.
- A working knowledge of geological modelling software.
- A professional geoscientist designation or eligibility for registration.

These are full time positions based at our northern sites in Saskatchewan on a rotational basis. Remuneration will be commensurate with experience, qualifications, and the attainment of performance-related objectives.
